

Make your environment Runecast® solid.

VMware Knowledge Base

Runecast Analyzer 1.5

Your infrastructure

VMware Knowledge Base Scans

Discover hidden issues and avoid service outages

Compliance Checks

Security Hardening and Best Practices checks

Log Analysis

Detect known issues in real time

Quick and Secure Deployment

OVA deployed on premises - no data leaves your data center

"We needed audit tools that could scan our cloud environment and give suggestion/solution how to match our cloud with VMware best practices and we found all that in Runecast Analyzer"

Reza Kertadjaja
Chief Operations Officer,
Indonesian Cloud

"Whether you manage a small VMware vSphere environment, larger enterprise or service provider, you will find a value in this product."

Vladan Seget
Independent consultant, professional blogger,
vExpert 2009 - 2017, VCAP5-DCA/DCD, VCP

"I consider this tool a must-have for any VMware admin."

Mike Ellis
vExpert

"We have fixed all issues discovered with your wonderful product and are now running smoother than ever."

Alexandre Potier
VMware engineer,
ProBTP

"I really, really like the idea and how it works. Just the ability to find potentially vulnerable components based on hardware AND ESXi version AND driver version is awesome!"

Anders Olsson
VCDX, VCI

less troubleshooting, more innovating.

Runecast is an innovative provider of actionable predictive analytics for VMware® vSphere® environments. Runecast Analyzer provides software-defined expertise to mitigate service outages, increase security and compliance and reduce time in troubleshooting. Runecast Analyzer is deployed in VMware environments across the globe within enterprise and SME customers.

feature rich

Proactive

See and fix issues before they appear

Configuration Analysis

VMware Knowledge Base articles, Best Practices and VMware Security Hardening Guide all rolled onto your environment

Multi-tenancy

Connect all your vCenters to a single Runecast Analyzer appliance and take control from a single dashboard

Security

No data leaves your data center

Log Analysis

Analysing your logs to prevent documented issues

Lightweight

Runecast Analyzer comes as a virtual appliance

Extensive Expertise

Created by a team of industry leaders (VCDX, VCAP, ITIL)

User-friendly Dashboard

Control the future of your environment from a single place

business benefits

Cost avoidance

Reduces the level of unplanned downtime and the costs associated with system failures

Increased IT Operational efficiency

Runecast automates up to 95% of security compliance checks, 80% of problem detection and prevention and 70% of technical troubleshooting

Mitigate Risk

Runecast can prevent up to 90% of all issues and 99% of all known issues that others experienced before you

Increased Security

In minutes, Runecast reports how you fare against Global Security Standards and recommends fixes. It takes Audit Readiness to the next level.

Increased uptime

In minutes, Runecast reveals every misconfiguration on the system and shows how many Industry Best Practices are not being followed
